Sling Compatibility & Task Selection

This chart will help guide you with the compatibility of a sling & hoist and the appropriate use of each combination for a given task. There may be exceptions to this.

We recommend a full patient risk assessment is carried out prior to any transfer to determine individual requirements.

Surgical Lighting - Astramax AM30 Mobile, 150kLux

Features

- Full spectrum colour rendition, allows small differences to be easy to distinguish
- Fat beam illumination ensures high light intensity across the full illuminated area
- Red balance control provides enhanced visualisation of red tissues, & improved differentiation between tissues of similar colour
- Ultra slim & light-weight lamp head enables smooth, fast & precise positioning during procedures
- Astramax HD-LED® provides 150,000 Lux output at 1 metre & offers a long life of >60,000 hours, equating to more than 20 years of normal use
- A large illuminated area of 320mm diameter makes it easier to illuminate large areas of tissue & target light onto the wound
- An even spread of LEDs across the lighting surface ensures even distribution & enables excellent shadow control
- The lamp head is mounted on arms with a multi-movement mechanism, allowing positioning within a wide envelope of movement
- Five rotations allow easy positioning of the light beam from any angle
- Uses less than 50 watts of power & with >60,000 hours of LED life, Astramax HD-LED® saves money on energy & maintenance
- Base fitted with four castors allows the light to be easily positioned
- The lamp head is sealed to IP54 to protect from ingress of dirt fluids, whilst smooth surfaces of the lamp head allow for easy disinfection
- The lamp head is manoeuvred using a sterilisable handle (disposable handles are available as an option)
- Integral emergency backup battery provides 3hrs life (minimum)

Examination Lighting - Coolview®, CLED23™ TX, Articulated Arm, Mobile, 60kLux

Features

- Coolview® CLED23™ provides 60,000 Lux output at 0.5 metre
- Light intensity can be altered through 4 easily selectable settings, providing a suitable level of intensity for all procedures
- A large, illuminated area of 210mm diameter makes it easy to examine large areas of tissue & makes it easier to target the light on the patient
- CLED23™ reproduces all of the visible colours naturally & accurately. The high Ra of 95 describes the exceptionally high quality of white light whilst the high R9 of 90 measurement describes how it accurately reproduces visible red
- CLED23™ allows the user to adjust the colour temperature of the light source, enhancing the clinician's ability to recognise & distinguish tissue conditions. The warm white (3,500°K) setting is ideal for dermatological examinations, whilst the daylight white setting (4,500°K) is ideal for the recognition of blood vessels
- The Coolview® CLED23™ light head has 360° rotation, allowing the user to position the light beam to suit any procedure, without any restrictive stops or twisted cables
- The examination light can be used to provide ambient room lighting by reflecting light from the ceiling, a feature often used in neonatal care to provide night lighting
- Uses less than 50 watts of power & with >30,000 hours of LED life, saves money on energy & maintenance
- The long, 1200mm arm reach ensures the powerful beam can be positioned all around the patient couch, allowing for 'head to toe' examination of the patient without the need for patient repositioning
- An innovative spring-based arm system ensures the light is positioned effortlessly, remains fixed in place & is maintenance-free
- A five-star base allows the light to be easily positioned
- The light head is sealed to IP20, protecting from ingress of dust & moisture
- The easy to use & ergonomic control pod allows all lighting to be adjusted with a simple press of a button

Illuminated Magnifier - Optica MDV Optimal Colour Magnifier, Articulated Arm, Mobile

Features

- Large magnifier diameter of 157mm combined with 1.9x (3.5dpt) magnification allows the user to focus on fine details through a large-scale view
 - 6,500°K LEDs ensure less shadow formation and optimal colour rendering
 - The exceptional Ra of >93 accurately displays the high quality of white light & the R9 value >90 describes how accurately the user can differentiate between red tissues
 - Reinforced friction joints & an aluminium spring balanced arm allows a broad reach of up to 142cm without the lamp head drifting, allowing smooth handling for users to examine typically harder to reach places with ease
 - A five-star base allows the light to be easily positioned
 - The light head is sealed to IP20, protecting from ingress of dust & moisture
 - Uses less than 50 watts of power, & with >50,000 hours of LED life, saves money on energy & maintenance
 - A durable lens cover protects the magnifier lens from dust or potential scratches.
- Magnifiers can be a potential fire risk if left in direct sunlight
