

Bristol Maid™
Hospital Metalcraft™ Limited 

Seating Solutions

Medical Furniture & Equipment 2023

Founded in 1953, Bristol Maid has been manufacturing and supplying medical furniture & equipment for over 65 years. From design and manufacture to supply and installation, Bristol Maid has a reputation for providing high product quality, excellent customer service and value for money. We take pride in working in close partnership with our customers to deliver effective solutions based on innovative design and technology that will meet the demands of today while anticipating the solutions for tomorrow.

Our highly-trained staff are experienced in every aspect of customer support, from simple product selection to bespoke technical solutions, from on-site audits to complex project management arrangements, according to our customers' needs. Bristol Maid's commitment to quality is based on years of experience working with healthcare professionals in an exacting and regulated environment, and is supported by an ISO 9001:2015 quality management system that is registered with a UKAS accredited certification body.

If you require further assistance, please do not hesitate to contact our Customer Service team who are here to help; or alternatively can arrange for your Regional Sales Representative to visit and help find a solution that best suits your requirements.

Seat Options For Pressure Management

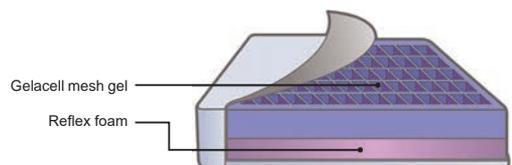

Cushions are covered in multi-way stretch, vapour permeable fabric which is wipeable, removable, washable at 95°C, incontinence proof & breathable.

Coolform Pressure Risk **MEDIUM** → **HIGH**

For those sitting for long periods with specific comfort issues, such as a high risk of pressure sores. Uses the latest medical grade silicone gel technology allowing pressure to be evenly distributed.

The gel conforms to the shape of the body, equalises to body temperature, allows air to flow easily & is totally odourless & hypoallergenic.

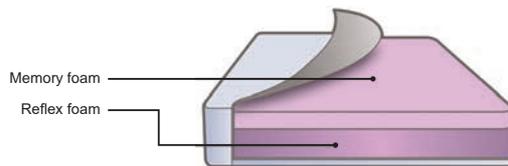

Celliform Pressure Risk **MEDIUM** → **HIGH**

For those sitting for long periods of time with specific comfort issues, such as a high risk of pressure sores & shear forces.

Gelacell's unique grid design eliminates pressure points, contouring in response to the transfer of weight, evenly distributes pressure & reduces heat absorption, keeping the seat cooler & fresher.

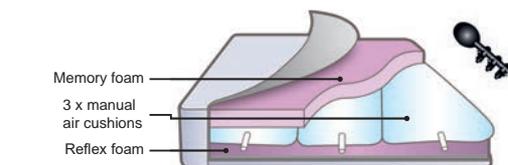

Pressure risk levels detailed are for guidance only. Each individual user has different posture, medical needs & health issues which contribute to the performance of any pressure cushion. If in doubt, please consult a GP or Health Care Professional.

Viscoform Pressure Risk **LOW MEDIUM**

For those who have good posture & mobility, but are seated for periods longer than one hour, require pressure relief & supported comfort.

High density foam provides support, whilst a top layer of memory foam allows submersion into the cushion, providing a large surface area to reduce pressure levels.

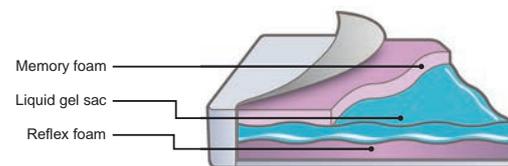

Airform Pressure Risk **HIGH**

For those who have good posture, but are unable to alter their position easily & require high level pressure care.

This cushion provides the benefits of an air cushion, however without the sensation of alternating changes in air pressure.

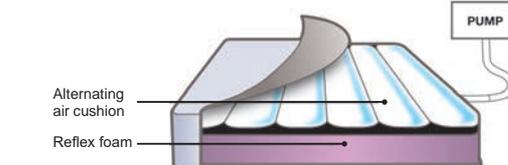

Suitable for users 40 - 127kg.

Liquiform Pressure Risk **MEDIUM** → **HIGH**

For those who have good posture & mobility, but are seated for long periods of time, require pressure relief & supported comfort. Excellent for people with little fatty tissue.

High density foam provides support, topped with layers of fluid liquid gel & memory foam to provide high levels of pressure relief. The liquid gel helps to dissipate heat, whilst constantly adapting to movement.

Dynaform Pressure Risk **VERY HIGH**

For those at very high risk of developing pressure sores, or have a history of sores, where the priority is to prevent further pressure damage.

Dynaform is a dynamic alternating air cushion, which constantly changes air levels within its cells to recreate the effect of pressure relieving & prevent pressure build up.

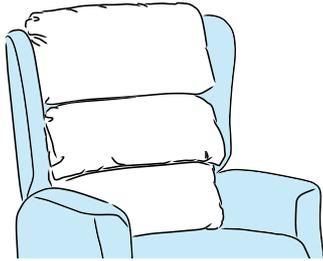

Air cell features

- 6 dynamic cells 10cm wide
- 3 cell cycle repeated every 9 minutes

Suitable for users 40 - 121kg.

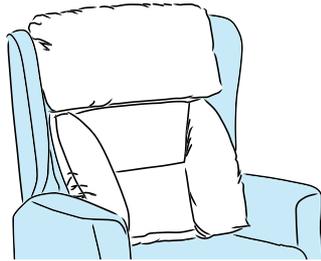

Please note the Dynaform cushion does need an electric supply at all times to operate.

Back Cushion Options

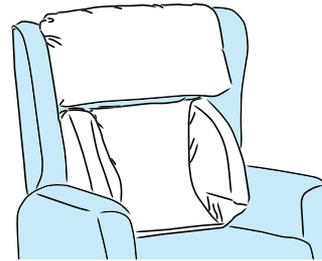

Waterfall Back Cushion

Individual waterfall cushions, fully adjustable to accommodate maximum postural support

Comfort Lateral Back Cushion

Soft fibre filled removable lateral cushion for lower back & side lumbar support, without feeling restricted

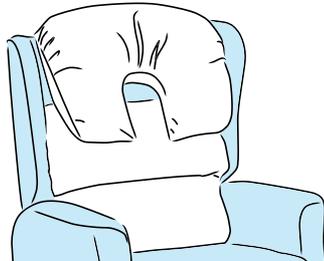

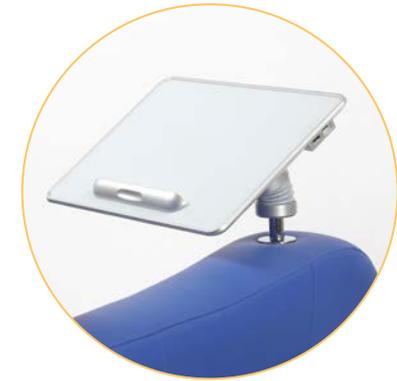

Support Lateral Back Cushion

A foam filled back providing firmer lateral support with a soft fibre filled headrest

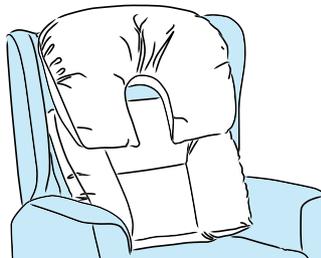

Table with Wireless Charging

360-degree rotation & angle adjustable table with a wipe clean surface. Supports Qi wireless charging & fitted with a USB socket. Removable magnetic bar provides support & ensures correct positioning on the wireless receiver coil, wipe clean surface (w 345 x h 245mm)

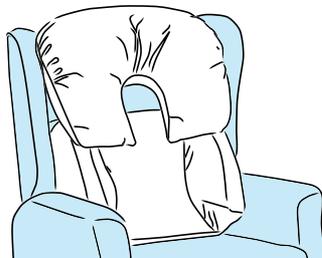

Large Profile Headrest with Waterfall Back

For those with limited head control & requiring a soft adjustable lumbar support

Large Profile Headrest with Comfort Lateral Back

For those with limited head control & requiring soft lateral support without feeling restricted

Large profile headrest with Support Lateral Back

For those with limited head control, requiring firm foam lateral lumbar & midline support

Headrest Options

Head Pillow

Head Roll

Small Profile Headrest

Large Profile Headrest

Midline Headrest

Overnight Chair - Portland, Three Position

Features

- Multi-functional compact chair that provides comfortable seating by day, transforming into a bed by night
- Suitable for use in maternity units, children's wards, relative's rooms, hospices & care homes

Care & Cleaning

Vinyl's are resistant to most mild acids, alkalis, drinks & household stains. Clean with a damp, soapy cloth & rinse well with clean water. Dry the surface thoroughly. A soft brush with soapy water may be used to remove stubborn stains. Ensure surfaces are then rinsed & dried. Do not use solvents, bleaches*, abrasives, synthetic detergents, wax polishes or aerosol sprays. Disinfectants may be used in dilution as specified by their manufacturers.

* Chlorine Releasing Agents: Levels of 1-10,000 parts per million should pose no problems as long as the material does not endure long soakings at the higher concentrations. Rinse well with clean water. These include Haz-Tabs & other disinfectants commonly used in hospital infection control programmes. Surfaces are NaDCC compatible.

Fabric

Fabric - Camira Advantage

Vacuum regularly. Wipe clean with a damp cloth or shampoo using proprietary upholstery shampoo.

Fabric - VP Multi-Way Stretch

Wipe with mild detergent. Wash or dry clean using detergent up to 75°C. For disinfection use sodium hypo-chlorite at no more than 1,000 parts per million of active chlorine. Do not use biological or phenolic-based cleaners. Wash & dry completely. Some surface wrinkling may occur.
