

Intelligent Locking Solutions for Medicine Management

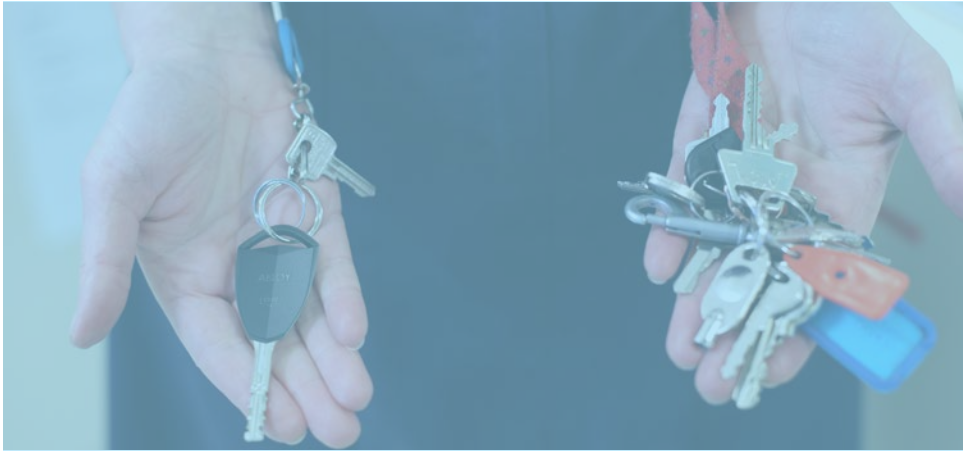

Bristol Maid™
Hospital Metalcraft™ Limited

ABLOY

THE MOST COMMON PHRASE ON ANY HOSPITAL WARD... “WHO’S GOT THE KEYS TO THE DRUG CABINET?”

Nurses have many responsibilities and not enough time! Nurses can visit drugs cupboards up to 50 times per shift. One study found that this could waste up to 40 minutes per shift looking for keys — and substantially longer if the keys have been taken from the ward. This is time lost from Patient Care. At a time when efficiency drivers are the ‘key’ to success within the NHS, a solution needs to be found...

TIME IS MONEY

Although Healthcare is undoubtedly a business, the value of time isn't that simple and managing time has more impact than purely a monetary return. Efficient management of Nursing time has efficiency, reputation and financial benefits.

PRE-CLIQ

Patients

Waiting for overdue drugs to be administered:

- Distressed
- Frustrated / angry
- Complaining

Nurses

Not enough time to complete all their tasks, including providing patients drugs:

- Stressed
- Poor service
- Low morale
- Complaining

Hospital

The impact on a hospital and its reputation:

- Wasted cost, inefficient performance
- Patient's complaints of poor service
- Poor CQC Audit performance

MEDICINE MANAGEMENT - DRUG STOCK CONTROL, SECURITY, ACCOUNTABILITY... AND MORE TIME TO CARE

One key can open all these Cabinets PROTEC² CLIQ

The Award winning, PROTEC² CLIQ by ABLOY is an electronic key system that can be applied to static and mobile drugs containers - flexible secure and compliant to the Safe Custody of Medicines Act 1973 and electronic technology, enabling traceability of staff and continuously changing access rights. Keys can be automatically disabled if lost or stolen, reducing risk while also allowing each nurse to carry their own key.

IF YOU COULD FIND....

A cost-effective solution that improves medicine management including drug security and stock control, that also eliminates a high proportion of nurses wasted time and delivers an attractive Return on Investment, why wouldn't you want it?

POST-CLIQ

Patients

Receive drugs on time:

- Satisfied
- Good service
- Good morale
- Motivated

Nurses

Administer patient's drugs on time

- Relaxed
- Satisfied
- Speak well of the staff and hospital to family and friends

Hospital

The impact on a hospital and its reputation:

- Effective medicine management, stock control, money saved
- Patients compliment good service
- Excellent CQC audit performance

EFFICIENCY

Medicine management

Take control of drugs stock, audit trails of personal access

More time to care

Each Nurse can save up to 40 minutes per shift in wasted time, looking for keys as one key opens many locks

Improve patient care

Patients get their drugs on time, giving more time for each nurse to provide patient care

Improve staff morale

One ward sister reported that the CLIQ system “changed their lives”, not having to look for keys, a better way of working

Improve CQC audit performance

Enabling you to effectively supervise and manage the use of controlled drugs

Zero staff resistance

Experience shows that following trials and experiencing the significant benefits, mean nurses welcome the CLIQ system

Easy retrofit

No disruption to staff, patients or the running of the ward during installation

SECURITY

Reduce risk of lost keys

Keys can quickly and easily have their rights deleted if they are lost or stolen

Speeds up Investigations

In the event that drugs go missing, the full audit history helps you accurately identify ‘who, where and when’

Increased stock control of drugs

Only the registered key holders can access restricted areas at any given time, and access is audited

Reduced Theft

Reduce the risk of theft of controlled drugs and patient property

INNOVATION

Integrated and encrypted system

The CLIQ system can integrate with other systems to help manage controlled drugs stock monitoring, etc.

Individual accountability

Keys provide permission-based traceable access for each nurse, so you know who used which key in which lock and when

Future-proofed technology

The system can be expanded as required and software upgrades are included in the agreement

Digital and mechanical technology

Gives you the benefits of proven physical security and full digital management and control of access to controlled drugs

Flexibility and convenience

The CLIQ system can be installed in drugs cabinets, drugs trolleys, patient lockers and POD lockers - and can be operated from FOB's, RFID and even wrist bands

FOR TRUST IN HEALTHCARE

Return on investment

An estimate from one chief pharmacist and clinical lead for medicines Management estimates that the money saved in released nursing time equates to an ROI of 600% in a year

Affordable

Installations can be scheduled on a ward by ward basis over a period of time to provide an affordable solution

CASE STUDY: QUEEN ELIZABETH HOSPITAL, BIRMINGHAM

Inderjit Singh
Chief Pharmacist,
Queen Elizabeth Hospital,
speaking about CLIQ®:

“It doesn’t take a significant amount of capital resources to install the system, it is the lock system itself that you are installing. The lock is powered by the key itself therefore no wiring required to locks and cupboards, ideal for fixed or mobile drug cabinets and you can easily retro fit to existing cupboards.

Another aspect which we are planning to extend it to will be around patients bedside POD lockers. In the event of patients self medicating, they will be given a credit card type swipe so they can easily access their own medication.”

1,100 Drug Cupboards

6,900+ Staff

1,215 Beds

1,286 Keys

30 Theatres

Complete Solution from
Bristol Maid & Abloy UK

CASE STUDY: KETTERING GENERAL HOSPITAL NHS FOUNDATION TRUST

Andrew Deacon

Pharmacy Informatics – IT Technician
Kettering General Hospital NHS Foundation Trust,
speaking about CLIQ®:

“After trialling the CLIQ System in our Emergency Department we invested in a fully installed system across our trust. The CLIQ system is not only saving the Nurses frustration but more importantly time which can go back into Patient Care for a much safer compliant system when accessing medicines.

The security and accessibility of medicines is never compromised, as we can delete lost keys from the system. The CLIQ system also includes a full audit trail of knowing who has accessed a cupboard and when, it's also given us more control over the access that the different grades of staff will need.”

600 Drug Cupboards

4,000 Staff

1,215 Beds

2,245 Keys

17 Theatres

Complete Solution from
Bristol Maid & Abloy UK

Manufacturing Medical Furniture & Equipment Since 1953

With over 65 years of experience, Bristol Maid is a leading manufacturer and supplier of medical furniture & equipment.

From design and manufacture to supply and installation, Bristol Maid has a reputation for providing high product quality, excellent customer service and value for money.

We take pride in working in close partnership with our customers applying innovative design and technology to deliver effective solutions for today while anticipating the needs of tomorrow.
